Now the serious breeder, exhibitor, and fancier is able to evaluate each dog's temperament, and add the letters, to the dog's name.

The temperament test is designed for dogs at least 12 months of age. The method of administration is concise and complete using simple but logical guidelines.

These temperament evaluations show a dog's reaction to his environment. A dog has either good temperament or not, no matter what breed! But all breeds of dogs do show a different disposition as part of the characteristics of that particular breed.

Testers evaluate the dog's reactions at each of the 10 subtests. A walk through may be provided. At that time questions may be asked.

During the test, dogs are on a choke-type collar and a 6 ft. lead. They may not be under any kind of command or attempted influence by the handler.

The character and/or disposition of all breeds of dogs varies depending on what they were meant to be used for. ie. herding, sledding, hunting, working or guarding. But **GOOD TEMPERAMENT IS GOOD TEMPERAMENT** and **BAD TEMPERAMENT IS BAD TEMPERAMENT - IN ANY DOG OF ANY BREED.** In these evaluations all dogs are judged according to their age, breed and socialization.

The owner of each dog passing the testing requirements will receive a certificate with the dog's name and breed designation. The dog's name may now be listed with the letters TT after the dog's name.

Inquire about holding a Temperament Test in your area!

Apprentice testers are welcomed.

Shouldn't your dog carry a TT behind his name?!
